

President's Message  
October, 2010

Ron Perisho

Our speaker for the September, 2010 meeting was Ron Perisho. Ron amazed the group with a presentation of the American Civil War in 3D. The set up alone is very interesting. It takes a large screen, two projectors and individual glasses for the viewer. It was not only fascinating to see the photos but to notice the detail. The presentation was informative and we appreciate that Ron took the time to speak at our round table.

I am pleased to announce that we have two new members. They are Dean Enderlin and Eric Oser.

The annual Christmas party will be held at "Legends". A special thank you to Rebekah Thomas for arranging this event. If you have not signed up yet, kindly let me know if you plan to attend. Specific details have been e-mailed.

Ladies only question was answered by Judy Lubas. The first woman in the United States to receive a medical degree was Elizabeth Blackwell.

November's speaker is Dr. David Davenport from the San Joaquin Round Table. He is currently researching approximately 300 American civil war soldiers who are buried in Fresno County. He will share his research methods which not only can help with a civil war reference but other times periods as well. He also comes from afar, so your support is appreciated.

We have several members who belong to the Elmer Ellsworth Camp #23, Sons of Union Veterans. They participated in a Veteran's Day reinstallation of cannons at the Grand Army of the Republic Monument located in the Santa Rosa Rural Cemetery. Photos of the participants will be published to the web site.

Regards,

Tom Lubas  
President
